SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Go

Technologies & Tools: Django, DRF, Celery, React, Next.js, Node.js, PostgreSQL, MySQL, Redis, AWS (ECS, EC2, RDS, SQS, S3), Docker, Supabase, Claude Code, MCP, n8n

WORK EXPERIENCE

TheTripGuru, Remote

Mar 2021 - Present

Senior Software Engineer (promoted from Full Stack Developer)

- Built the OTA distribution stack driving over 70% of TripGuru's bookings across three API integrations - GetYourGuide's supplier API, the OCTO standard (Klook), and Bokun, which fans out to TripAdvisor, Expedia, Airbnb, and Civitatis - covering availability sync, reservation, booking, and cancellation.
- Automated booking creation from partner confirmation emails on non-API platforms (Hotelbeds, KKDay, Ceetiz) using n8n and LLM-based PDF parsing, ingesting 300 bookings per month - roughly 10% of total volume - with no manual entry.
- Designed and rolled out the engineering team's agentic development workflow on Claude Code - custom skills, orchestration rules, PR creation and review templates, and MCP integrations with GitHub and Notion - now the standard path from ticket to merged PR.
- Led migration of the operations admin from legacy Django admin to a new Next.js platform, rebuilding inventory (tours, packages, package groups, availability schedules), bookings, coupons, tour guides, and vendors - used daily by Operations, Supply, and Business Development.
- Built the guide operations system end to end: a Tour Guide PWA (Auth0, WhatsApp OTP) for activity requests, availability, compliance documents, and payment tracking, and OPA, which automates the activity lifecycle via a TOPSIS-based guide recommendation engine, auto-assignment on acceptance, and WhatsApp confirmation through Gupshup - replacing manual dispatch.
- Built the CI/CD pipeline on GitHub Actions - running the Django test suite on every PR to staging and deploying to AWS ECS on merge - and introduced the team's PR review and standup practices.
- Python, Django, DRF, Celery, MySQL, Redis, Next.js, React, AWS (ECS, ECR, RDS, SQS, S3), Docker, GitHub Actions, Auth0, Claude Code, n8n

Vogo (acquired by Chalo), Bengaluru

Sept 2019 - Mar 2021

Full Stack Developer

- Built Vogo Keep, the flagship long-term rental product - package selection, scooter discovery, booking, and payments - from frontend through backend integration; mentored juniors and interns.
- Delivered a single React PWA serving Android, iOS, and web through a WebView bridge, removing the need for separate native clients; shipped KYC onboarding and selfie verification.
- Python, Django, DRF, Celery, MySQL, React, JavaScript, AWS (ECS, EC2, RDS, S3), Docker

Manch, Bengaluru

Nov 2018 - Sept 2019

Software Engineer (first engineering hire)

- Built a notification microservice in Go from scratch and scaled it to 50,000 active users.
- Developed the core Express.js API, consumer website, and internal dashboard; owned provisioning and deployments.
- Go, JavaScript, Node.js, Express, Next.js, MongoDB, Elasticsearch

Datapeace AI Technologies, Delhi - Backend Developer

Apr 2018 - Oct 2018

- Built the REST API for the first version of a smart surveillance platform covering visitor and attendance management, and integrated core AWS services into its deployment. Python, Django, DRF, AWS

PROJECT WORK

- **Zodrive (2026):** Doorstep driving-lessons platform live in Bengaluru, built and operated end to end. PostGIS polygon-based serviceability zones for coach-to-student matching, Cashfree payments, and WhatsApp booking notifications. Next.js 15, Supabase.
- **Provers.in (2024):** AI-powered SSB interview preparation platform with 1,000+ active users and paying subscribers. Built an LLM pipeline scoring free-text responses on observation, creativity, and clarity. Next.js, Firebase.
- **Eglify (2022):** Referral marketing platform for local businesses. Merchants configure reward rules and generate referral links; customers track progress while merchants verify redemptions against campaign analytics. Django, Next.js, AWS.

EDUCATION

Shri Mata Vaishno Devi University, Jammu

Aug 2014 - Mar 2018

B.Tech in Computer Science and Engineering
